Explanations on the Operating Results and Financial

- 1) The Company's operating results in Q3 increased by 73% compared with the same period last year, similar to the strong performance in the first half of the year. This is mainly due to the rapid growth in operating revenue in the first half of the year, driven by the company's strategic focus on domestic automotive electronics and the recovery of the consumer and industrial markets.
- 2) The gross profit margin of the Company in Q3 increased by 6% compared with the same period last year, mainly due to the rapid growth of high-margin products in the first half of the year. The increase in gross profit margin is mainly caused by gains and losses on foreign exchange.
