Important Notice

Specification apply to die only. Actual performance may degrade when assembled. does not guarantee device performance after assembly. All operating parameters must be validated for each customer application by customer's technical experts. Data sheet information is subjected to change without notice.	Recommended Storage Environment: Store in original container, in dessicated nitrogen, with no contamination. Shelf life for parts stored in above condition is 2 years. If the storage is done in normal atmosphere shelf life is reduced to 6 months.
